

The EV Partner

POWERING DEVELOPMENTS; SMARTLY, SIMPLY & SUSTAINABLY

From 2022 all new developments are required to install EV Chargers. The EV Partner specialises in providing the perfect charging solutions to suit any development regardless of size.

Why US?

- We offer a full turn-key solution to ensure simplicity and expertise for all projects from procurement to fitting to after care
- We work with developers, councils, management companies and the private rental sector to source, project manage and install charging solutions for any residential, industrial and commercial developments
- With our volume procurement we are able to greatly reduce all costs and pass on these savings of up to 25% directly to our clients
- We are an independent supplier and installer working in partnership with leading electric vehicle charge point manufacturers
- We aim to find the best unique solution for each EV charging need. Our Project management teams will assist through every stage of the installation process
- We offer a completely national, fully trained and OLEV approved installation team throughout the UK

Our Turn-Key Solution

- Project Management
- Analysis of existing and future power requirements
- Hardware recommendations
- Full Implementation and installation
- Contractor Coordination
- Rebate/Grant Application Process
- Commissioning and Training
- Feasibility Studies
- Aftercare, warranties and maintenance
- Dedicated account management

Our Pledge

We Care for our clients and our planet

- We pledge to plant a tree for every EV installation
- We believe that tackling climate change is not just a concern for our future, but our responsibility and priority in the present
- We know we can do so much more...

1 trees will absorb the equivalent of 13,000 miles of EV travel
